

AEM INTERVIEW NOTES

1. What is AEM Author and how is it different from Publish?

- Author: Used by editors to create, edit, and manage content.
- Publish: Serves final content to end users.

2. Authoring Workflow

- Create page -> Author content -> Review workflow -> Publish -> Dispatcher cache update.

3. Pages, Templates, Components

- Pages: Complete content pages.
- Templates: Structure/layout for pages.
- Components: Reusable building blocks.

4. Editable vs Static Templates

- Editable: Stored in /conf, author-friendly.
- Static: Stored in /apps, developer-controlled.

5. Experience Fragments

- Reusable experience blocks exported across channels.

6. Content Fragments

- Structured, headless content stored in DAM.

7. JCR Structure

- Hierarchical storage: /content, /content/dam, /apps, /conf.

8. CRXDE Lite

- Developer tool for viewing node structure; authors rarely use.

9. MSM (Multi Site Manager)

- Manages multiple sites with shared content.

10. Live Copy and Blueprint

- Blueprint: Master site.
- Live Copy: Inherits from Blueprint.
